

Teaching methods

The Objectives: Preparing competent physical education teachers

Subject vocabulary

Review third grade vocabulary, such as physical exercises

Modern formations and how to prepare a teaching plan

Verifying the teaching plan and how to prepare the plan notebook

From the fourth week of the first semester, practical application begins to perform the study plan for each student, both male and female, under teaching supervision, teaching methods for each section, and until the end of the semester, this includes a test for each student, both male and female, during practical application, and for more than one test, and giving assignments to all students individually, for example, writing several study plans for all subjects. The process is for the purpose of training students to write as many typical teaching plans as possible and apply them

Second Semester

1- Application in schools and under the supervision of a teacher teaching methods.

2- When the students return from the application for the remainder of the second semester, they will work with the students to find out the problems that hindered their work in schools and conduct some models of typical lessons.
